EDUCATION

P P Savani university **2024 – 2025**
B.Tech - Computer Science and Engineering - CGPA - 8.01 *Surat, Gujarat*

EXPERIENCE

FullStack Developer at Patoliya Infotech  **July 2025 – Present**
Role - Web Developer *Surat, Gujarat*

- Refactored legacy architecture into a monorepo structure, improving code organization by **30%**, enhancing scalability, and streamlining team collaboration.
- Designed and implemented an architecture for tracking activities of multiple users across the system, enabling efficient monitoring, logging, and analysis of user behavior.
- Designed and developed multiple custom animated components for the project.
- Reduced API calls by **70%** (from 14M) by designing an optimized user activity architecture and implementing both frontend and backend.
- Developed the **Smartflow** feature used by thousands of customers across millions of devices.
- Designed and built an **MCP server**, an internal **Node.js package**, and multiple **SDKs** from the ground up, enabling third-party developers and tools to integrate seamlessly with the company's product.

Intern at Patoliya Infotech  **January 2025 – June 2025**
Role - Web Developer *Surat, Gujarat*

- Redesigned the complete API architecture, reducing average response time from **~3s to ~500ms** through optimized queries, efficient data flow, and backend refactoring.
- Developed role-based dashboard access control, ensuring secure and personalized views for different user roles.
- Implemented role-based employee management with scalable CRUD operations, reusable components, and client-side caching to reduce API calls, improve performance, and fix critical bugs.

PROJECTS

Cypress | React, Next.js, Supabase, Socket.io, AI Integration **GitHub** | **Live**

- Designed interactive features within a note-taking platform to support remote teamwork; identified and eliminated three primary causes of session-crashing bugs through rigorous testing protocols.
- Implemented AI-driven template generation, boosting content creation productivity by **30%**.
- Enabled real-time collaboration with Socket.io, increasing user engagement by **40%**.

Devflow | React, Clerk, MongoDB, API Integration, AI Integration **GitHub** | **Live**

- Directed the development of a community-driven platform enabling over **1,000 developers** to collaborate and share solutions; integrated AI capabilities for delivering fast, accurate answers.
- Crafted an intuitive front-end with React, enhancing UI responsiveness by **35%**.
- Incorporated Clerk for seamless user authentication and role-based access, improving user retention by **30%**.
- Optimized MongoDB database performance to handle high traffic, reducing latency and improving throughput.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, C++

Databases: PostgreSQL, MySQL, MongoDB

Frameworks/Libraries: Next.js, React.js, Node.js, Express.js, Tailwind CSS, Bun

Tools/Platforms: Git, GitHub, Notion, VS Code, Figma

Technologies: REST APIs, Supabase, WebSockets, Cypress, N8N

CODING PLATFORMS & ACHIEVEMENTS

- Solved **600+** problems with a max rating of **1800+** on **LeetCode**, ranking in the top **15%** globally.
- Solved problems with a max rating of **1660+** on **GeeksforGeeks**.
- Secured **2nd place** in the internal hackathon at Patoliya Infotech.
